

ASTM D1250-04 Software

Temperature and pressure volume correction factors for generalized crude oils, refined products, and lubricating oils.

ROFA - Laboratory & Process Analyzers, Mag. Matthias Fiedler
Hauptstraße 145, A-3420 Kritzensdorf, AUSTRIA
e-mail: office@rofa.at, nell@rofa.at

➤ ASTM D1250-04 Software for PC

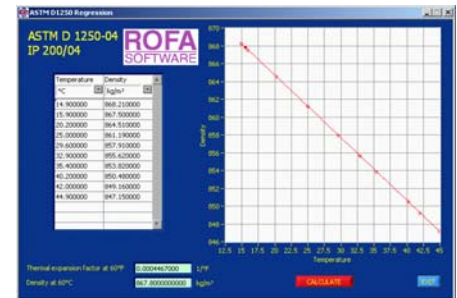

- ASTM D1250-04 VCF: Software to calculate density and volume from any temperature and pressure condition to base condition and any alternate temperature and pressure condition.

- ASTM D1250-04 Tables: Software to generate volume correction factors in tabular format as used in previous versions of the standard.

- ASTM D1250-04 Regression: Software to calculate density at 60°F and the thermal expansion factor at 60°F from measured density values.

➤ ASTM D1250-04 Software for Pocket PC (PDA)

Software to calculate Volume Correction Factors on your Pocket PC.

➤ ASTM D1250-04 Dynamic Link Library

A Microsoft Windows compatible 32-bit Dynamic Link Library (DLL) that provides a callable collection of routines that perform all calculations of the ASTM D 1250-04 standard and that can be included in own applications.
